

Yitao Zeng

zengyt2023@mail.sustech.edu.cn | 24zen0.github.io | github.com/24zen0 | [Google Scholar](#)

Education

Southern University of Science and Technology (SUSTech)

2023–Present

B.Eng. in Automation

GPA: 3.87/4.00 | Rank: 2/35

Academic Advisor: Prof. Wei Zhang

Relevant Coursework: Advanced Control for Robotics (Graduate), Robotic Motion & Control, Computer Vision, AI & Machine Learning, Optimal Control & Estimation, Data Structures & Algorithms

Chengdu No. 7 High School

2020–2023

Publication

StereoVLA: Enhancing Vision-Language-Action Models with Stereo Vision

Shengliang Deng, Mi Yan, Yixin Zheng, Jiayi Su, Wenhao Zhang, **Yitao Zeng**, . . . , He Wang

Accepted to Robotics: Science and Systems (RSS), 2026

Technical Skills

- **Robot Learning:** reinforcement learning, diffusion policy, ACT, Legged-Gym, sim-to-real evaluation and real-robot policy deployment
- **Robotics & Systems:** ROS/ROS2, PX4, MAVROS, CAN communication, camera/sensor calibration, UAV and robotic-arm integration
- **Tools & Languages:** PyTorch, Isaac Sim/Lab, MuJoCo, Git, Docker, Weights & Biases; Python, C++

Research & Project Experience

Aerial Grasping Research

Jun. 2026–Present

Research Intern, Smart Autonomous Robotics (STAR) Group, SUSTech — Advisor: Prof. Boyu Zhou

- Ongoing physical-UAV aerial-grasping research.
- Paper in preparation.

Robot Learning Systems and Data Engineering

Jan.–Jul. 2026

Research Intern, Beijing Galbot — Mentor: Prof. He Wang

- Converted and validated a TFDS robotics dataset into the project's LeRobot representation using HPC resources, diagnosing conversion and resource-management issues during parallel processing.
- Supported real-platform checks for data-conversion correctness and explored how data representation, evaluation design, and simulator mismatch affect robot-learning experiments.

3D Diffusion Policy for Robotic Manipulation

Feb.–Dec. 2025

Project Contributor, CLEAR Laboratory, SUSTech — Academic Mentor: Prof. Wei Zhang

- Owned point-cloud preprocessing for a real-robot 3D Diffusion Policy project, using workspace cropping and farthest-point sampling to retain task-relevant geometry.
- Co-built and deployed the perception-to-action pipeline across calibration, demonstration collection, depth-to-point-cloud processing, policy training, and real-robot testing on Franka and ARX arms.
- Investigated how calibration, point selection, demonstrations, and control conventions shape performance in desktop manipulation tasks.

Research & Project Experience (continued)

Reinforcement Learning for Point-Foot and Wheel-Foot Locomotion

Jun. 2025–Jan. 2026

Course and Competition Projects, SUSTech — Academic Mentor: Prof. Wei Zhang

- Progressed from a point-foot Isaac Gym course project to a wheel-foot Sim2Sim/Sim2Real competition adaptation, then to a substantially self-owned point-foot Isaac Lab/Isaac Sim course project with disturbance evaluation and a harder curriculum.
- Worked on reward-function settings, terrain curricula, and stair-climbing adaptations; carried policies across Isaac Gym, MuJoCo, and a physical wheel-foot platform.
- In the competition project, our wheel-foot system completed an 18 cm real-stair protocol in 10/10 attempts under a consistent robot, stair, and success criterion.

Open-Source Contribution

RoboVerse — Open-Source Contributor

Jul.–Aug. 2025

- Reproduced implementation and environment inconsistencies in Isaac Sim and RoboVerse, compared learning curves and robot behaviors, and submitted a fix through [PR #398](#).

Selected Awards & Honors

Grand MVP Award — Hong Kong Physical AI Hackathon

1st of 37 teams, Aug. 2026

- Led the robotic-arm deployment strategy for a team project: hardware assembly, network communication, demonstration collection, ACT policy training/deployment, and MCP-based integration between the controller and an AI agent; delivered the final presentation in English.

Outstanding Team Award — LimX Dynamics Tron Camp

1st of 7 finalist teams, Jul.–Aug. 2025

- Configured and tested wheel-foot stair-climbing adaptations, including RL reward and terrain-curriculum tuning, for the team's real-robot demonstration.

Provincial Gold Medal — Chinese National Challenge Cup

Ranked 4th in Guangdong, 2025

- Led final-stage technical communication and presentation refinement for an autonomous robotic fishing-vessel project, synthesizing feedback from eight expert panelists.
- **First Prize Scholarship, SUSTech** — Ranked 3rd of 188 students.
- **Platinum Award & Best Functional Design Award, Da Vinci Challenge Camp** — 1st of 6 teams (2024); built an autonomous retrieval vehicle and led navigation/control implementation.
